

# Concept Scheme B = **CREATING A MAGNET**

Scheme B is inspired by the unique landscapes of water of the region of Syracuse, its history and elements:

**ONONDAGA LAKE**  
**SALT**  
**GLACIERS**  
**TECTONICS OF GLACIERS**  
**UNCOVERED LAYERS OF SEDIMENTS**

At a different scale there is one additional landscape of water that has informed the design of Scheme B: The memory of water represented by the old fountain at Leavenworth Circle.

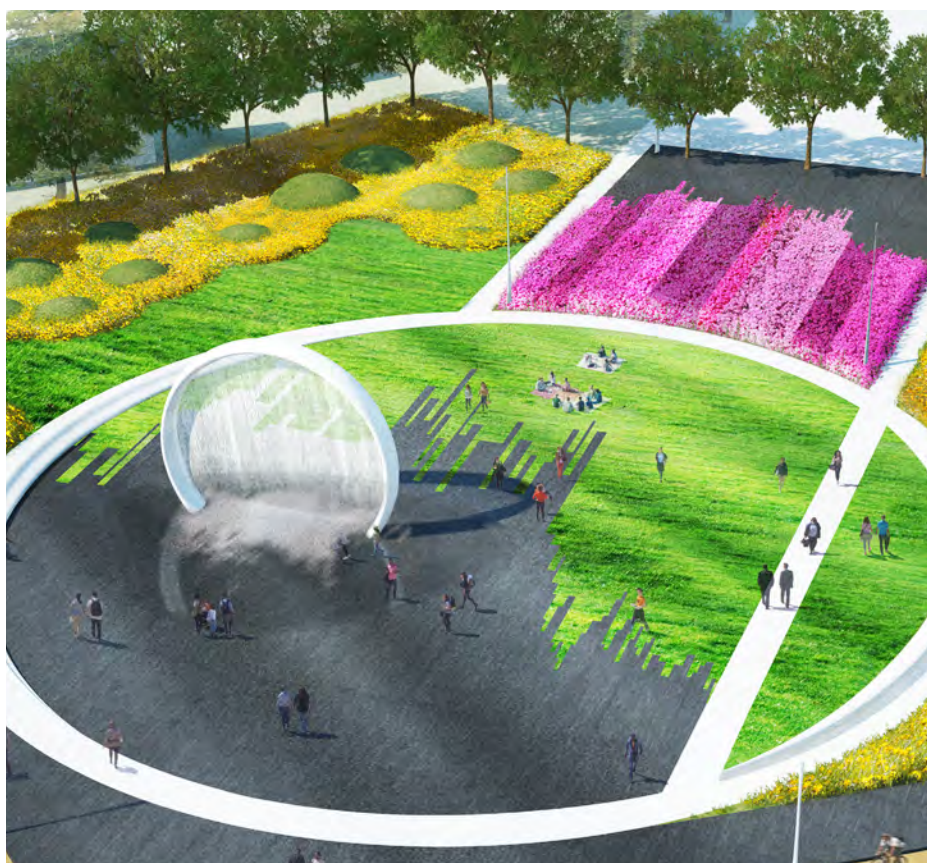

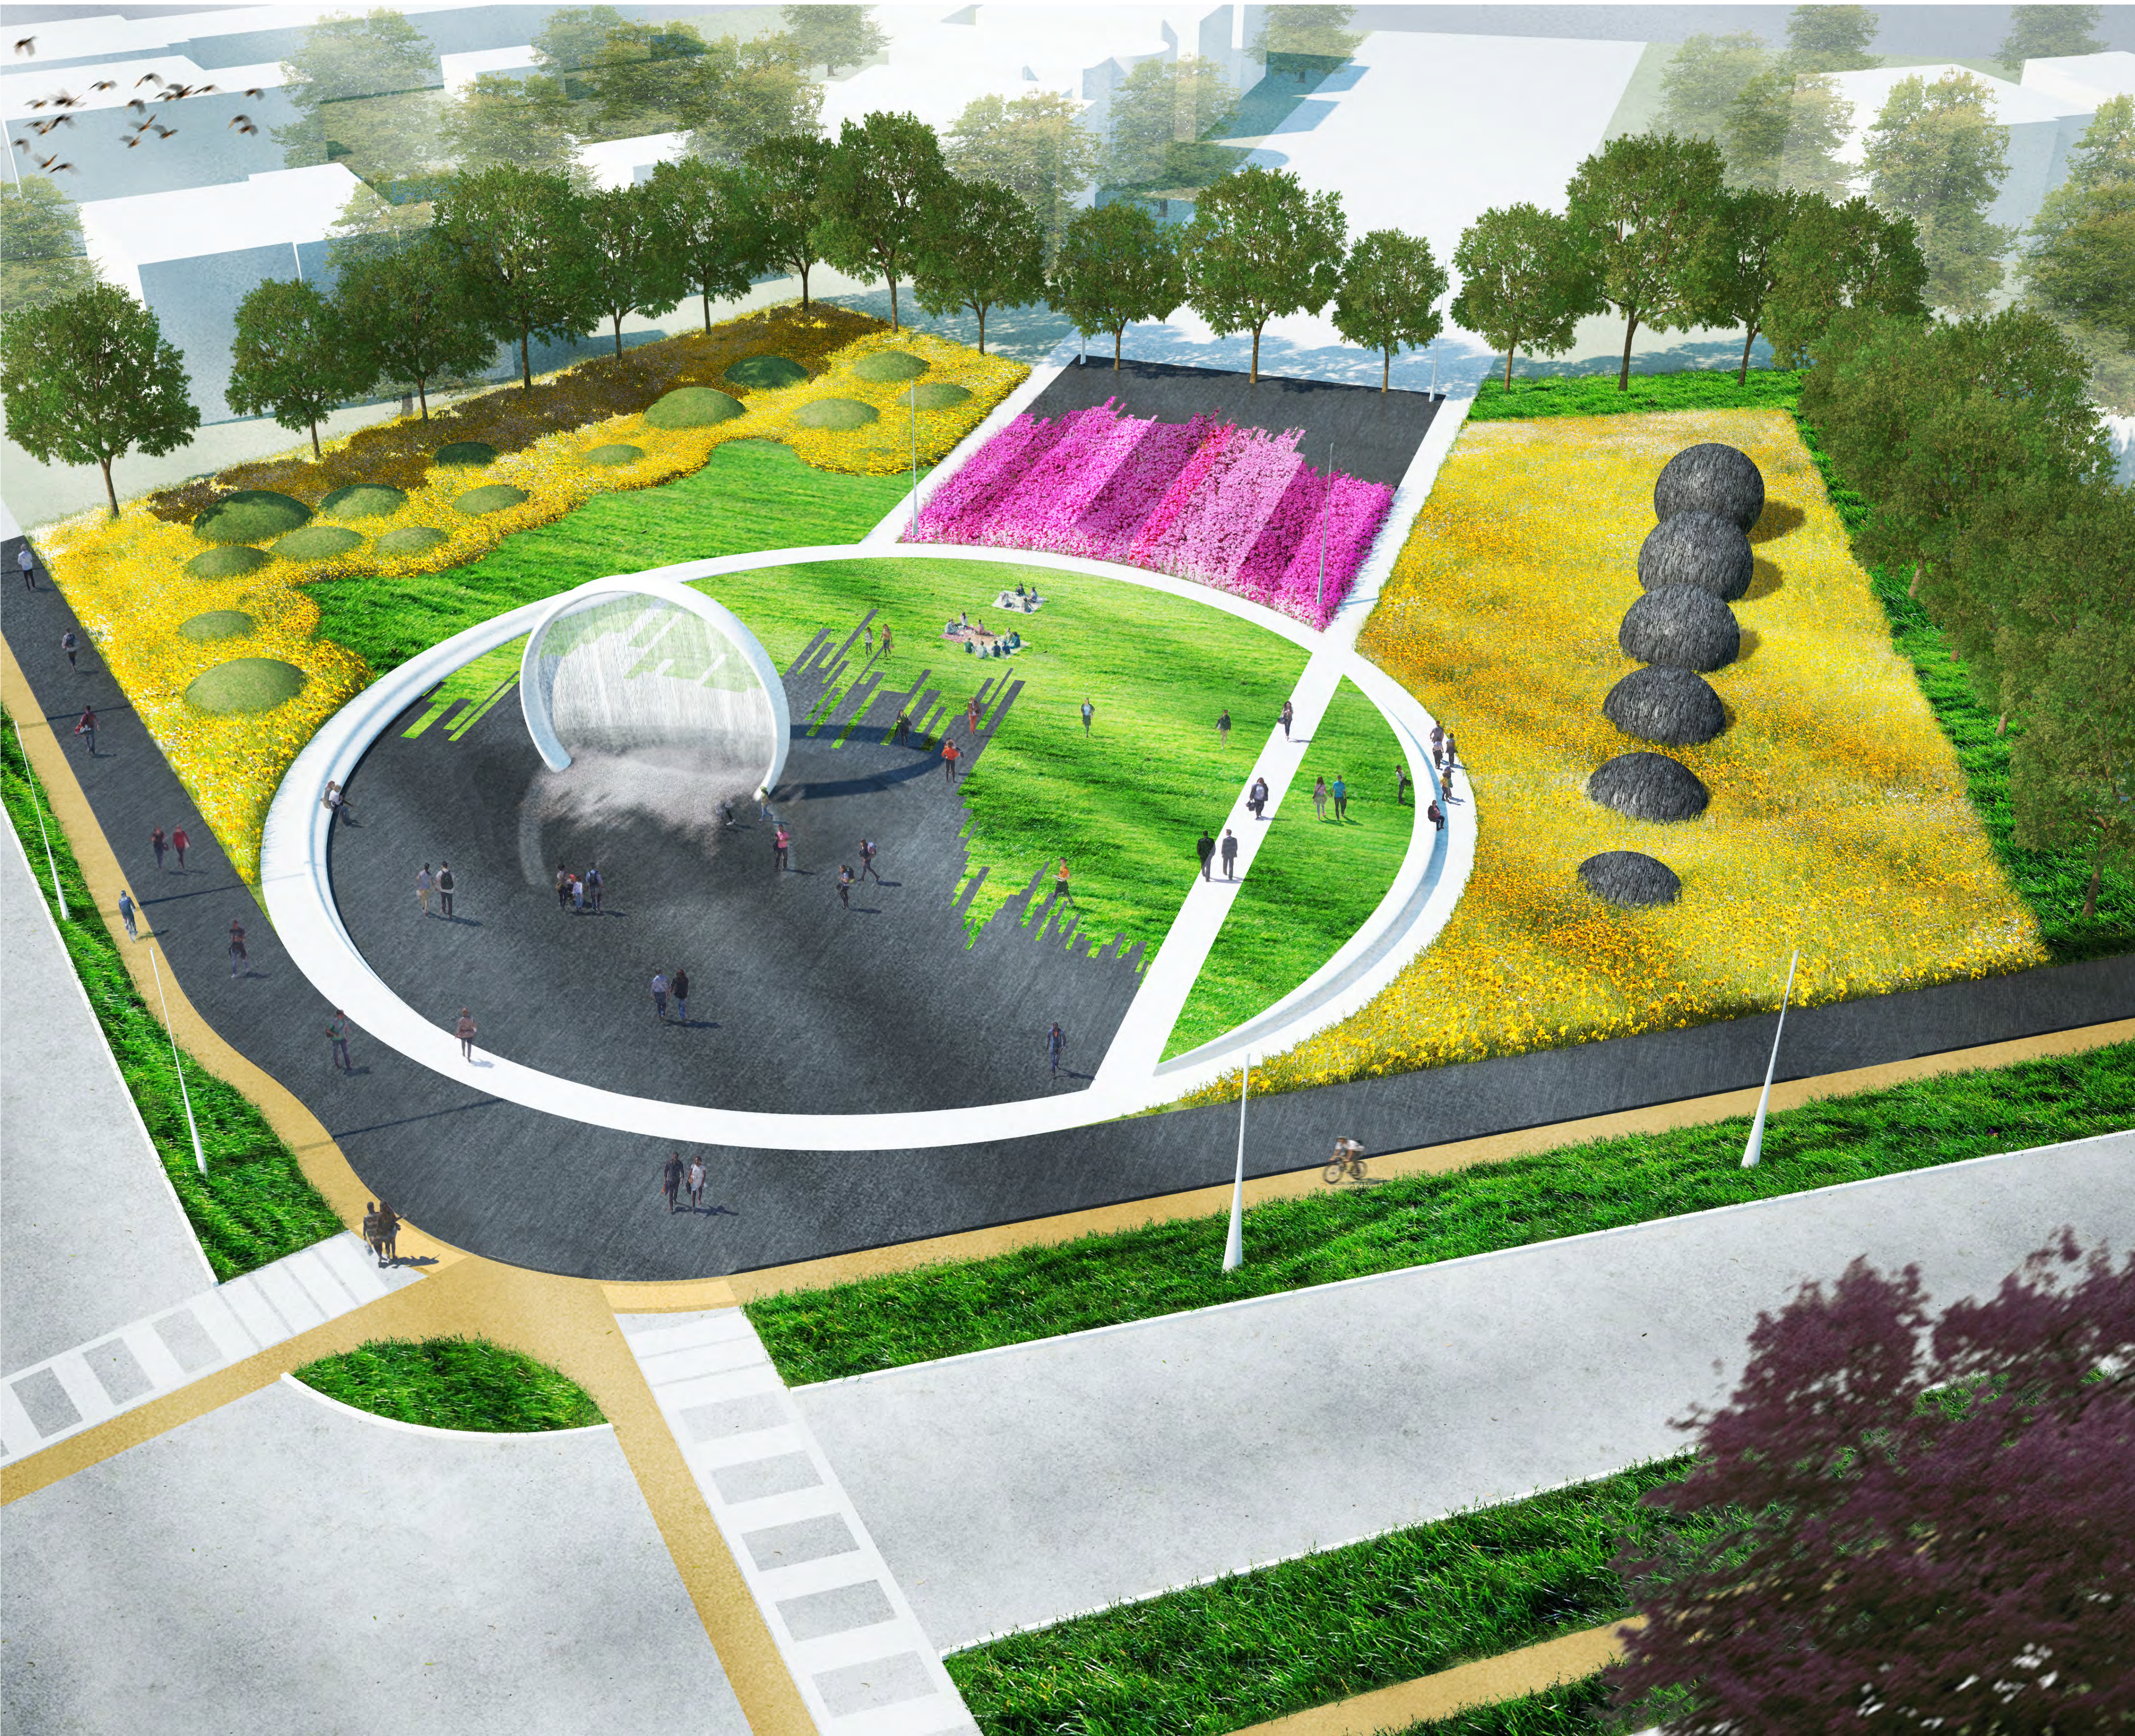

Scheme B presents a space founded in the memory of water envisioned to be a city scale magnet and a place for community interaction.

**Scheme B - The MAGNET**
